

# TOPTHERM CLEAN F STEEL

## CLEANING PRODUCT FOR COMBUSTION CHAMBERS OF STAINLESS STEEL CONDENSING BOILERS

### Description

**TOPTHERM CLEAN F STEEL** is an acid product for removing deposits and oxides inside combustion chambers of stainless steel condensing boilers.

The use of the product allows to restore the correct thermal exchange by removing the deposits.

### How to use

Spray the product to the incrustated surfaces until they are completely wet and let it react from 3 to 5 minutes, according to the quantity of dirt. After the reaction period, thoroughly brush and rinse the combustion chamber. If the dirt has not been removed totally, repeat the cleaning operation.

### Physical and chemical properties:

Aspect: colourless liquid  
pH: about 1,5

### Environmental and safety information
